Section A

Vol. 88, January–December 1979

SUBJECT INDEX (Chemical Sciences)

Absolute rate theory
Viscosities of binary mixtures containing one polar component 109

Acetylenic esters
Reaction of acetylenic esters with 1,8-diaminonaphthalene, 1,8-dihydroxynaphthalene and 8-hydroxy-1,2,3,4-tetrahydroquinoline 1

Acid
A study of the nature of coordination in metal monothiocarbamates based on infrared spectroscopy and the HSAB concept 393

Adduct formation constant and chelates
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II) 313

Aldo-sugars
Oxidation of organic compounds by phenyl iodoso acetate(II). Kinetics and mechanism of oxidation of aldo-sugars 203

Ambident nucleophile
Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship 329

Aminoquinones
Spectral properties of some amino substituted *p*-benzoquinones 155

Aromatic aldehydes
Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide 163

Aromatic carboxylic acids
Aromatic carboxylic acids as extraction system for vanadium in the presence of N-hydroxy-N, N′-diarylbenzamidine 297

Aromatic hemiterpenes
Synthetic studies in aromatic hemiterpenes of natural origin. Part 5: Synthesis of 6-acetyl-2,2-dimethyl-8-methoxychromene via benzylic oxidation route 197

Aromatic isothiocyanates
Polarographic studies on the quantitative treatments of substituent effects of some aromatic isothiocyanates 137

4-Aryl-3,4-dihydrocoumarins
Synthesis of 3-methyl-coumarins,-thiacoumarins and carbostyrils 125

Assignments of energy levels
Polarized crystal spectrum of bisethylenediamine copper(II) thiosulfate 143

3-aza-benzo(j) phenanthridine
New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes 191

9-azaphenanthridine
New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes 191

Benzylic carbon
Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship 329

Benzylic oxidative dehydrogenation by DDQ
Synthetic studies in aromatic hemiterpenes of natural origin. Part 5: Synthesis of 6-acetyl-2,2-dimethyl-8-methoxychromene via benzylic oxidation route 197

Bignoniaceae
Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent. 323

Binary mixtures
Volume change on mixing: binary mixtures of methanol with isomeric butylamines 47

Binary systems
Volume change on mixing of isomeric butanols with normal heptane 249

Binary systems
Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex 337

Bisethylenediamine copper(II) ion
Polarized crystal spectrum of bisethylenediamine copper(II) thiosulfate 143

Bisphenylhydrazones
Photo-oxygenations of bisphenylhydrazones, monophenylhydrazones, bishydrazones and monohydrazones of 1,2-diketones and related systems 223

Bloomfield-Dewan theory
Viscosities of binary mixtures containing one polar component 109

Born equation
Thermodynamics of the complexation reactions of UO_2^{2+}, Be^{2+} and Cu^{2+} with methoxybenzoic acids 149

Born-green-yvon equation
Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function 465

Butanols-heptane
Volume change on mixing of isomeric butanols with normal heptane 249
Butylamine-methanol
Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex 337

Carbon-nickel ferrite electrodes
Effect of surface oxygen complexes of sugar charcoal on the half cell potential of carbon-nickel ferrite electrodes 439
Cell potential
Effect of surface oxygen complexes of sugar charcoal on the half cell potential of carbon-nickel ferrite electrodes 439
Chemical perturbation
Green's function application to chemical perturbation studies 453
4-Chloro pyridine-N-oxide
4-Nitro and 4-chloro pyridine-N-oxide complexes of lanthanide perchlorates 413
5-Chloro-8-quinolinol
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with Nickel(II) 313
Chloryl fluoride ClO_3F
Force field study of chloryl fluoride (ClO_3F) using Green's function procedure 101
Chromenes
Synthetic studies in aromatic hemiterpenes of natural origin. Part 5: Synthesis of 6-acetyl-2,2-dimethyl-8-methoxychromene via benzylic oxidation route 197
Chronoamperometry
The electrochemical behaviour of tris (N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401
Clebsch-Gordon coefficients
Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function 465
CNDO/2
Electronic structure and conformational study of thiobiurets 91
Complexes
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 377
Complex plane polarography
Electrochemical reduction of Cu(II)-EDTA complex at dropping mercury electrode. An impedance approach 33
Conductance
Conductance of sodium nitrate in ethanol-water mixtures at 35° C 53
Conductivity
Electrical conductivity studies in K_2SO_4-ZnSO glasses 11
Conformation
Electronic structure and conformational study of thiobiurets 91
Coordination
Spectrophotometric study of the formation of adducts between $U(TTA)_4$ and some neutral donors 303
Coordination polymers
Magnetic and electrical properties of coordination polymers of 4,4′-dihydroxy-3,3′-diacetylbiphenylbenzidine 63
Copper
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 377
Copper sulfate pentahydrate
Dehydration steps in $CuSO_4 \cdot 5H_2O$ crystals 113
Coulometry
The electrochemical behaviour of tris(N, N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401
Coumarins
Extractives of *Balsamodendron pubescens*: Stocks, Hook. Isolation and a new synthesis of siderin 185
Coumarins
Synthetic studies in aromatic hemiterpenes of natural origin. Part 5: Synthesis of 6-acetyl-2,2-dimethyl-8-methoxychromene via benzylic oxidation route 197
Crystal structure
Phase transition in magnesium metavanadate 19
Cu-EDTA system
Electrochemical reduction of Cu(II)-EDTA complex at dropping mercury electrode. An impedance approach 33
Cu-PSB
Magnetic and electrical properties of coordination polymers of 4,4′-dihydroxy-3-3′-diacetylbiphenylbenzidine 63
Cyclic voltammetry
The electrochemical behaviour of tris (N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401
Cyclohexane
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43

Dearylation by aluminium chloride
Synthesis of 3-methyl-coumarins,-thiacoumarins and-carbostyrils 125
2,11-diazachrysene
New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes 191
Dichloro-pyridazine
Electronic and vibrational spectra of 3,6-dichloro-pyridazine 279

Dielectric constant
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43
Dielectric constant
Dehydration steps in $CuSO_4.5H_2O$ crystals 113
Differential scanning calorimetry
Synthesis and thermal stability of xylene-formaldehyde resins 371
Differential thermal analysis
Synthesis and thermal stability of xylene-formaldehyde resins 371
Dissociation energy
Dissociation energy in P_2^+ molecule 257
Dithiobiuret
Electronic structure and conformational study of thiobiurets 91
DNA
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263
DNMR of ionyl derivatives
Spectroscopic properties of molecules related to hindered isomers of retinal 239
Drop time
Characterisation of streaming polarographic maxima 317
Drug-receptor interaction
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171

Electrical and magnetic properties
$Co_{3-x}Zn_xO_4$ $(0 \leq x \leq 1)$ spinel oxides 217
Electrical conductance
Complexes of lanthanide nitrates with O,O′ N-triisopropyl phosphoramidate 291
Electrical conductivity
Dehydration steps in $CuSO_4.5H_2O$ crystals 113
Electrochemical behaviour
The electrochemical behaviour of tris(N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401
Electrochemical reduction
Electrochemical reduction of Cu(II)-EDTA complex at dropping mercury electrode. An impedance approach 33
Electronic absorption spectra
Electronic absorption spectra of selenocarbonyl and thiocarbonyl compounds 359
Electronic forces
A study of interaction in the lowest singlet and triplet states of H_2 445
Electronic parameters
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171
Electronic spectra
Electronic structure and conformational study of thiobiurets 91
Spectral properties of some amino substituted *p*-benzoquinones 155
Electronic and vibrational spectra of 3,6-dichloro-pyridazine 279
Electronic structure
Electronic structure and conformational study of thiobiurets 91
Energy conversion
Solar energy and solid state chemistry 69
Enthalpy of complexes
Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex 337
Equilibrium studies
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263
Ethanol
Conductance of sodium nitrate in ethanol-water mixtures at 35° C 53
Excess viscosity
Viscosities of binary mixtures containing one polar component 109
Excess volumes
Volume change on mixing of isomeric butanols with normal heptane 249

Ferricyanide
Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide 163
Flavone glucuronide
Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent. 323
Flory theory
Viscosities of binary mixtures containing one polar component 109
Force constants
Force field study of chloryl fluoride (ClO_2F) using Green's function procedure 101
Force field diacetylene molecule
A force field study of diacetylene molecule by kinetic constant method 351
Free volume theory
Viscosities of binary mixtures containing one polar component 109
FSGO
Floating spherical Gaussian orbital model study of average electric polarisabilities and magnetic susceptibilities: Some aliphatic hydrocarbons 367

Gas adsorption effect
Semiconductive properties of biologically important compounds: Gas adsorption effect on vitamin A (alcohol and acetate) 25
Gas adsorption kinetics
Semiconductive properties of biologically important compounds: Gas adsorption effect on vitamin A (alcohol and acetate) 25
Gibbs-Helmholtz equation
Thermodynamics of the complexation reactions of UO_2^{2+}, Be^{2+} and Cu^{2+} with methoxybenzoic acids 149
Green's function
Green's function application to chemical perturbation studies 453
Green's function procedure
Force field study of chloryl fluoride (ClO_2F) using Green's function procedure 101

Hallucinogens
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171
Hammett correlation
Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship 329
Hammett equation polarographic studies on the quantitative treatments of substituent effects of some aromatic isothiocyanates 137
Hard and soft base
A study of the nature of coordination in metal monothiocarbamates based on infrared spectroscopy and the HSAB concept 393
Heats of mixing
Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex 337
Hydrazido carbonates
Preparation and characterization of hydrazine derivatives. Part II : Reaction of transition metal ammonium double sulphates with hydrazine hydrate 211
Hydrazine derivatives
Preparation and characterization of hydrazine derivatives. Part II : Reaction of transition metal ammonium double sulphates with hydrazine hydrate 211
Hypersensitive bands
2,4-Lutidine-1-oxide complexes of lanthanide perchlorates 131

Ice cubes
Melting of ice cubes under controlled conditions 285
Impedance method
Electrochemical reduction of Cu(II)-EDT-complex at dropping mercury electrode. An impedance approach 33
Indium
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 337
Infrared spectra
Spectral properties of some amino substituted *p*-benzoquinones 155
Complexes of lanthanide nitrates with O,O′, N-triisopropyl phosphoramidate 291
Infrared spectra and normal vibrations of O-methylmonothiocarbonate S-methyldithiocarbonates and N-methylmonothiocarbamates, methyltrithiocarbonate, and related ions 457
Integral differential equation
Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function 465
Internuclear separation
A study of interaction in the lowest singlet and triplet states of H_3 445
Ionisation potential
Dissociation energy of P_2^+ molecule 257
Isotopic rules
Force field study of chloryl fluoride (ClO_2F) using Green's function procedure 101

Kinetic constants
A force field study of diacetylene molecule by kinetic constant method 351
Kinetics
Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide 163
Oxidation of organic compounds by phenyl iodoso acetate(II). Kinetics and mechanism of oxidation of aldo-sugars 203
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263

Lanthanide nitrate complexes
Complexes of lanthanide nitrates with O,O′, N-triisopropyl phosphoramidate 291
Lanthanide perchlorates
2,4-Lutidine-1-oxide complexes of lanthanide perchlorates 131
4-Nitro and 4-chloro pyridine-*n*-oxide complexes of lanthanide perchlorates 413
Lead
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 377
Lippincott potential function
Dissociation energy of P_2^+ molecule 257

Liquid mixtures
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43
Local anesthetics
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171
2,4-Lutidine-1-oxide
2,4-Lutidine-1-oxide complexes of lanthanide perchlorates 131

Magnesium metavanadate
Phase transition in magnesium metavanadate 19
Magnetic susceptibility
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43
Mandelic acid
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 377
Melting
Melting of ice cubes under controlled conditions 285
Methanol-butylamine isomers
Volume change on mixing; binary mixtures of methanol with isomeric butylamines 47
Methoxy quinones
Spectral properties of some amino substituted *p*-benzoquinones 155
3-methyl-carbostyrils
Synthesis of 3-methyl-coumarins, -thiacoumarins and -carbostyrils 125
3-methyl-coumarins
Synthesis of 3-methyl-coumarins, -thiacoumarins and -carbostyrils 125
4-methyl-8-quinolinol
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II) 313
3-methyl-thia-coumarins
Synthesis of 3-methyl-coumarins, -thiacoumarins and -carbostyrils 125
Mixing
Volume change on mixing: binary mixtures of methanol with isomeric butylamines 47
Mixing parameter
Force field study of chloryl fluoride (ClO_2F) using Green's function procedure 101
Model structure
Electrical conductivity studies in K_2SO_4-$ZnSO_4$ glasses 11
Molecular dynamics
A force field study of diacetylene molecule by kinetic constant method 351
Monophenylhydrazones
Photo-oxygenations of bisphenylhydrazones, monophenylhydrazones, bishydrazones and monohydrazones of 1,2-diketones and related systems 223
Monothiocarbamates
A study of the nature of coordination in metal monothiocarbamates based on infrared spectroscopy and the HSAB concept 393
Monothiobiuret
Electronic structure and conformational study of thiobiurets 91

Naphthodioxane
Reaction of acetylenic esters with 1,8-diaminonaphthalene, 1,8-dihydroxynaphthalene and 8-hydroxy-1,2,3,4-tetrahydroquinoline 1
1,2-Naphthynes
New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes 191
n-butyl alcohol
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43
Nickel
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II) 313
Nicotinic agents
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171
Ni-PSB
Magnetic and electrical properties of coordination polymers of 4,4′-dihydroxy-3,3′-diacetylbiphenylbenzidine 63
4-Nitro pyridine N-oxide
4-Nitro and 4-chloro pyridine-*n*-oxide complexes of lanthanide perchlorates 413
NMR
Spectroscopic properties of molecules related to hindered isomers of retinal 239
Nonstoichiometry
Phase transition in magnesium metavanadate 19
Normal vibration analysis
Infrared spectra and normal vibrations of O-methylmonothiocanbonate, S-methyldithiocarbonates and N-methylmonothiocarbamates, methyltrithiocarbonate and related ions 457
Nucleic acids
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263
Nucleophilic substitution
Nucleophilic substitution at a banzylic carbon by an ambident nucleophile—A linear free energy relationship 329

O-alkylation evidence
Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship 329
Organic semiconductors
Semiconductive properties of biologically important compounds: Gas adsorption effect on vitamin A (alcohol and acetate) 25
Orientational distribution function
Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function 465
Oroxylum indicum
Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent. 323
Oxidation
Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide 163
Oxidation mechanism
Oxidation of organic compounds by phenyl iodoso acetate (II). Kinetics and mechanism of oxidation of aldo-sugars 203
Oxygen complexes
Effect of surface oxygen complexes of sugar charcoal on the half cell potential of carbon-nickel ferrite electrodes 439
Oxide spinels
$CO_{3-x}Zn_xO_4 (0 \leqslant x \leqslant 1)$ spinel oxides 217

Padé type
Variational function of the Padé type—an application to a test system 179
Paratoluene sulphonic acid
Synthesis and thermal stability of xylene-formaldehyde resins 371
Perimidine naphthodiazepine
Reaction of acetylenic esters with 1,8-diamino-naphthalene, 1,8-dihydroxynaphthalene and 8-hydroxy-1,2,3,4-tetrahydroquinoline 1
pH effect
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263
Phenyl iodoso acetate
Oxidation of organic compounds by phenyl iodoso acetate (II). Kinetics and mechanism of oxidation of aldo-sugars 203
Photo-oxygenation
Photo-oxygenations of bisphenylhydrazones, monophenylhydrazones, bishydrazones and monohydrazones of 1,2-diketones and related systems 223
PMR spectrum of lactone acetate
Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent. 323
Polarisability
Floating spherical Gaussian orbital model study of average electric polarisabilities and magnetic susceptibilities: Some aliphatic hydrocarbons 367
Polarized electronic spectra
Polarized crystal spectrum of bisethylenediamine copper(II) thiosulfate 143
Polarography
Polarographic studies on the quantitative treatments of substituent effects of some aromatic isothiocyanates 137
Characterisation of streaming polarographic maxima 317
Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid 377
The electrochemical behaviour of tris(N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401
Poly (Schiff base)
Magnetic and electrical properties of coordination polymers of 4,4′-dihydroxy-3′-diacetyl-biphenylbenzidine 63
PPP-LCI
Electronic structure and conformational study of thiobiurets 91
Pseudoacid chloride
Aspects of tautomerism 8-solvolysis of some pseudo and normal acid chlorides 421
Pyridobenzoxazine
Reaction of acetylenic esters with 1,8-diamino-naphthalene, 1,8-dihydroxynaphthalene and 8-hydroxy-1,2,3,4-tetrahydroquinoline 1
Pyridynes
New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes 191

Reduction
Polarographic studies on the quantitative treatments of substituent effects of some aromatic isothiocyanates 137
Refractive index
Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane 43
Residual excess entropy
Viscosities of binary mixtures containing one polar component 109
RKRV curves
Dissociation energy of P_2^+ molecule 257
Rose Bengal
Photo-oxygenations of bisphenylhydrazones, monophenylhydrzaones, bishydrazones and monohydrazones of 1,2-diketones and related systems 223

Ru(III) catalysed oxidation
Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide 163
Ruthenium(III)
The electrochemical behaviour of tris(N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide 401

Scandium
Synergism in the extraction of scandium 385
SCC-EH
Electronic structure and conformational study of thiobiurets 91
Selenocarbonyl
Electronic absorption spectra of selenocarbonyl and thiocarbonyl compounds 359
Self-adducts
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II) 313
Semiconductive study
Semiconductive properties of biologically important compounds: Gas adsorption effect on vitamin A (alcohol and acetate) 25
Singlet oxygen
Photo-oxygenations of bisphenylhydrazones, monophenylhydrazones, bishydrazones and monohydrazones of 1,2-diketones and related systems 223
Sodium nitrate
Conductance of sodium nitrate in ethanol-water mixtures at 35° C. 53
Solar energy
Solar energy and solid state chemistry 69
Solid state chemistry
Solar energy and solid state chemistry 69
Solvent extraction
Aromatic carboxylic acids as extraction system for vanadium in the presence of N-hydroxy-N, N'-diarylbenzamidine 297
Spectrophotometric study of the formation of adducts between $U(TTA)_4$ and some neutral donors 303
Solvent influence
Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship 329
Solvolysis
Aspects of tautomerism 8-solvolysis of some pseudo and normal acid chlorides 421
Spectrophotometry
Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA-Au(III) system—spectrophotometric studies 263
Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II) 313
Spherical harmones
Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function 465
Stability constants
Thermodynamics of the complexation reactions of UO_2^{2+}, Be^{2+} and Cu^{2+} with methoxybenzoic acids 149
Structural transition
Phase transition in magnesium metavanadate 19
Structure
Extractives of *Balsamodendron pubescens* : Stocks, Hook. Isolation and a new synthesis of siderin 185
$Co_{3-x}Zn_xO_4$ ($0 \leqslant x \leqslant 1$) spinel oxides 217
Structure-activity
A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents 171
Sugar charcoal
Effect of surface oxygen complexes of sugar charcoal on the half cell potential of carbon-nickel ferrite electrodes 439
Sulphate glasses
Electrical conductivity studies in K_2SO_4-$ZnSO_4$ glasses 11
Surface active substance
Characterisation of streaming polarographic maxima 317
Susceptibility
Floating spherical Gaussian orbital model study of average electric polarisabilities and magnetic susceptibilities: some aliphatic hydrocarbons 367
Synergism
Spectrophotometric study of the formation of adducts between $U(TTA)_4$ and some neutral donors 303
Synergism in the extraction of scandium 385
Synthesis
Extractives of *Balsamodendron pubescens* : Stocks, Hook. Isolation and a new synthesis of siderin 185

Tautomerism
Aspects of tautomerism 8-solvolysis of some pseudo and normal acid chlorides 421
Thermal properties
Dehydration steps in $CuSO_4.5H_2O$ crystals 113
Thermodynamic parameters
Synergism in the extraction of scandium 385
Thermodynamics
Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex 337

Thermogravimetry
Synthesis and thermal stability of xylene-formaldehyde resins 371
Thiocarbamates
Infrared spectra and normal vibrations of O-methylmonothiocarbonate, S-methyldithiocarbonates and N-methylmonothiocarbamates, methyl-trithiocarbonate, and related ions 457
Thiocarbonates
Infrared spectra and normal vibrations of O-methylmonothiocarbonate, S-methyldithiocarbonates and N-methylmonothiocarbamates, methyltrithiocarbonate, and related ions 457
Thiocarbonyl
Electronic absorption spectra of selenocarbonyl and thiocarbonyl compounds 359
Trial function
Variational function of the Padé type—an application to a test system 179
Triisopropyl phosphoramidate
Complexes of lanthanide nitrates with O,O′, N-triisopropyl phosphoramidate 291
Trithiocarbonates
Infrared spectra and normal vibrations of O-methylmonothiocarbonate, S-methyldithiocarbnates and N-methylmonothiocarbomates, methyltrithocarbonate, and related ions 457

Ultrasonic velocity
Physico-chemcial behaviour of binary liquid mixtures : *n*-butyl alcohol in cyclohexane 43
$U(TTA)_4$-neutral donor adducts
Spectrophotometric study of the formation of adducts between $U(TTA)_4$ and some neutral donors 303

Variational function
Variational function of the Padé type—an application to a test system 179
Vibrational spectra
Electronic and vibrational spectra of 3,6-dichloro-pyridazine 279
Visible electronic spectra
Complexes of lanthanide nitrates with O,O′, N-triisopropyl phosphoramidate 291
Volume
Volume change on mixing : binary mixtures of methanol with isomeric butylamines 47
V(V)-HCPMCPTH chelate
Aromatic carboxylic acids as extraction system for vanadium in the presence of N-hydroxy-N, N′-diarylbenzamidine 297
Volume change
Volume change on mixing of isomeric butanols with normal heptane 249

Walden product
Conductance of sodium nitrate in ethanol-water mixtures at 35° C 53
Wogonin-7-O-β-D-glucuronide
Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent. 323

Xylene-formaldehyde resin
Synthesis and thermal stability of xylene-formaldehyde resins 371

Zero charge
Characterisation of streaming polarographic maxima 317

Section A

Vol. 88, January–December 1979

SUBJECT INDEX (Earth and Planetary Sciences)

Anticlinal axis
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1

Authigenic deposition rates
Geochemistry and geochronology of sediments from the Bay of Bengal and the equatorial Indian Ocean 131

Bioturbation
Radiometric studies of box cores from the Ontong-Java plateau 275

Calcareous sediments
Radiometric studies of box cores from the Ontong-Java plateau 275

Charnockite-khondalite series
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1

Convergence rates
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229

Correlation
Solar control of low latitude quiet-day magnetic field 93

Correlation coefficient
Geochemistry and geochronology of sediments from the Bay of Bengal and the equatorial Indian Ocean 131

Cosmic rays
Annual fallout of ^{32}Si, ^{210}Pb, ^{22}Na, ^{35}S and ^{7}Be in rains in India 29

Cratering efficiency
Effect of porosity on the cratering efficiency of underground peaceful nuclear explosions in a shale medium 77

Crossfield instability
On the origin of ionospheric sublayers in the lower thermosphere 219

Currents
Sediment movement and siltation in the navigational channel of the old Mangalore Port 121
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229

Dispersion characteristics
Reflection and transmission coefficients of electromagnetic waves incident on a linear ramp model of earth surface layer 209

Diurnal variation
Some features of the south west monsoon rainfall along the West Coast of India 177

D-region
Remote probing of *D*-region irregularities 57

Drift measurements
Magnetic storm effects in mesospheric winds and F_2 region electron density at mid-latitudes 201

Early-diagenesis
Vanadium, manganese and iron in the carbonate rocks of the Rohtas formation 19

Electric fields
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229

EM waves
Reflection and transmission coefficients of electromagnetic waves incident on a linear ramp model of earth surface layer 209

Erosion effect
Radiometric studies of box cores from the Ontong-Java plateau 275

Estuarine mixing
Preliminary investigations on dissolved uranium, silicon and major elements in the Mahanadi estuary 161

Equatorial electrojet
Equatorial electrojet control on the low latitude ionospheric total electron content 87

Equatorial ionosphere
Characteristics of very high frequency and ultra high frequency waves after their passage through the equatorial ionosphere 101

Equatorial spread-*F*
Variation of *F*-region night-time neutral temperatures with equatorial spread-*F* activity 69

Fallout
Annual fallout of ^{32}Si, ^{210}Pb, ^{22}Na, ^{35}S and ^{7}Be in rains in India 29

Fault
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1
Finite element, Galerkin, nonlinear and frictional processes relaxation factor, triangular elements
Wind-driven ocean circulation. A finite element analysis 111
Frequency spreading
On the origin of ionospheric sublayers in the lower thermosphere 219

Geochemistry
Geochemistry and geochronology of sediments from the Bay of Bengal and the equatorial Indian Ocean 131
Geochronology
Geochemistry and geochronology of sediments from the Bay of Bengal and the equatorial Indian Ocean 131
Geomagnetic disturbance
On the reality of the effects of geomagnetic disturbances on vorticity area index at 500 mb 171
Granite
Rb-Sr age of Godhra and related granites, Gujarat, India 7
Gravity gradients
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1
Gravity waves
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229

Hourly distribution
Some features of the south west monsoon rainfall along the West Coast of India 177

Ionisation constant
On the origin of ionospheric sublayers in the lower thermosphere 219
Ionosphere scintillation
Characteristics of very high frequency and ultra high frequency waves after their passage through the equatorial ionosphere 101
Ionosphere
On the origin of ionospheric sublayers in the lower thermosphere 219
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229
Ionospheric drift
On the interpretation of velocities derived from spaced fading records 41
Ionospheric total electron content
Equatorial electrojet control on the low latitude ionospheric total electron content 87
Irregularities
Remote probing of *D*-region irregularities 57
Isochron
Rb-Sr age of Godhra and related granites, Gujarat, India 7

Late-diagenesis
Vanadium, manganese and iron in the carbonate rocks of the Rohtas formation 19

Magnetic anomaly
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1
Magnetic storm
Magnetic storm effects in mesospheric winds and F_2 region electron density at mid-latitudes 201
Mahanadi estuary
Preliminary investigations on dissolved uranium, silicon and major elements in the Mahanadi estuary 161
Manganese
Vanadium, manganese and iron in the carbonate rocks of the Rohtas formation 19
Mesospheric wind
Magnetic storm effects in mesospheric winds and F_2 region electron density at mid-latitudes 201
Metallic constituents
On the origin of ionospheric sublayers in the lower thermosphere 219
Meteorite falls
A study of meteorite falls 247
Meteorite showers
A study of meteorite falls 247
Micrometeoric deposition
On the origin of ionospheric sublayers in the lower thermosphere 219
Minimum detection limit
Search for superheavy elements in monazite from beach sands of South India using *K* x-ray fluorescence analysis 155
Monazite search
Search for superheavy elements in monazite from beach sands of South India using *K* x-ray fluorescence analysis 155
Monsoon rainfall
Some features of the south west monsoon rainfall along the West Coast of India 177
Night-time neutral temperature
Variation of *F*-region night-time neutral temperatures with equatorial spread-*F* activity 69

Non-showers
A study of meteorite falls 247

Old Mangalore Port
Sediment movement and siltation in the navigational channel of the old Mangalore Port 121

Ontong-Java plateau
Radiometric studies of box cores from the Ontong-Java plateau 275

Partial reflection drift
On the interpretation of velocities derived from spaced fading records 41

Partial reflections
Remote probing of *D*-region irregularities 57

Peaceful nuclear explosions
Effect of porosity on the cratering efficiency of underground peaceful nuclear explosions in a shale medium 77

Photon induced fluorescence
Search for superheavy elements in monazite from beach sands of South India using *K* x-ray fluorescence analysis 155

Plasma instability
On the origin of ionospheric sublayers in the lower thermosphere 219

Porosity
Effect of porosity on the cratering efficiency of underground peaceful nuclear explosions in a shale medium 77

Precambrian
Rb-Sr age of Godhra and related granites, Gujarat, India 7

Radioisotopes
Annual fallout of ^{32}Si, ^{210}Pb, ^{22}Na, ^{35}S and ^{7}Be in rains in India 29

Radiometric studies
Radiometric studies of box cores from the Ontong-Java plateau 275

Radiowave absorption
Solar zenith angle and frequency dependence of ionospheric *D*-region absorption 51

Rainspells
Some features of the south west monsoon rainfall along the West Coast of India 177

Rainwater
Annual fallout of ^{32}Si, ^{210}Pb, ^{22}Na, ^{35}S and ^{7}Be in rains in India 29

Rb-Sr age
Rb-Sr age of Godhra and related granites, Gujarat, India 7

Reflection coefficients
Reflection and transmission coefficients of electromagnetic waves incident on a linear ramp model of earth surface layer 209

Regression
Solar control of low latitude quiet-day magnetic field 93

Secondary effect
Solar control of low latitude quiet-day magnetic field 93

Sector boundary passage
On the reality of the effects of geomagnetic disturbances on vorticity area index at 500 mb 171

Sediment movement
Sediment movement and siltation in the navigational channel of the old Mangalore Port 121

Semi-annual variation
Equatorial electrojet control on the low latitude ionospheric total electron content 87

Shale
Effect of porosity on the cratering efficiency of under-ground peaceful nuclear explosions in a shale medium 77

Silicon
Preliminary investigations on dissolved uranium, silicon and major elements in the Mahanadi estuary 161

Siltation
Sediment movement and siltation in the navigational channel of the old Mangalore Port 121

Solar cycle
Solar zenith angle and frequency dependence of ionospheric *D*-region absorption 51

Solar-magnetic cycle
Solar control of low latitude quiet-day magnetic field 93

Spaced receiver method
On the interpretation of velocities derived from spaced fading records 41

Streaming velocity
Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents 229

Sublayers
On the origin of ionospheric sublayers in the lower thermosphere 219

Superheavy elements
Search for superheavy elements in monazite from beach sands of South India using *K* x-ray fluorescence analysis 155

Suspended sediment load
Sediment movement and siltation in the navigational channel of the Old Mangalore Port 121

Synclinal axis
A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region 1

Thermosphere
On the origin of ionospheric sublayers in the lower thermosphere 219
Total electron content
Equatorial electrojet control on the low latitude ionospheric total electron content 87
Transmission coefficients
Reflection and transmission coefficients of electromagnetic waves incident on a linear ramp model of earth surface layer 209

Upper mantle
A qualitative appraisal of geomagnetic manifestations of the geological structure in the Indian equatorial region 1
Uranium isotopes
Preliminary investigations on dissolved uranium, silicon and major elements in the Mahanadi estuary 161

Vanadium
Vanadium, manganese and iron in the carbonate rocks of the Rohtas formation 19
Vorticity area index
On the reality of the effects of geomagnetic disturbances on vorticity area index at 500 mb 171

Wave propagation
Characteristics of very high frequency and ultra high frequency waves after their passage through the equatorial ionosphere 101

X-ray fluorescence
Search for superheavy elements in monazite from beach sands using *K* x-ray fluorescence analysis 155

Zonal wind
Magnetic storm effects in mesospheric winds and F_2 region electron density at mid-latitudes 201

SUBJECT INDEX (Mathematical Sciences)

Admissible pairs
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Admissible z-forms
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193

Alfvén velocity
Rayleigh-Taylor instability of compressible finitely conducting rotating fluid in the presence of a magnetic field 55
On Stoke's problem in magnetohydrodynamics 147

Algebraically special null Einstein-Maxwell field
A class of algebraically special null Einstein-Maxwell fields in Newman-Penrose formalism 125

Alpha-convex
On α-close-to-convex functions 93

Alpha-Wight
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Boundary layer flow
Laminar boundary layer of gas particulate flow on a flat plate 377

Boundary value problems
Existence and uniqueness of solutions of boundary value problems for third order nonlinear differential equations 105

Bounded families
Compactification of generalised Jacobians 421

Cauchy-Schwarz inequality
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21

Canonical form
On the equivalence of syntax-directed translations for context-free grammars 1

Classical parabolic subgroup
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Close-to-convex
On α-close-to-convex functions 93

Close-to-star-like
On α-close-to-convex functions 93

Condenser
Stresses in spherical shells of heterogeneous dielectrics 387

Constitutive relations
Steady flow of a second-order thermo-viscous fluid over an infinite plate 157

Context-free grammar
On the covering of syntax-directed translations for context-free grammars 1

Covering of grammar
On the covering of syntax-directed translations for context-free grammars 1

Defining pairs
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Demazure's character formula
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Dielectrics
Stresses in spherical shells of heterogeneous dielectrics 387

Difference equation
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21

Discretization error
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21

Dominant weights
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Double points
Compactification of generalised Jacobians 421

Dusty viscous flow
Dusty viscous flow through a cylinder of triangular cross-section 169

Ekmann number
On pulsatile flow of a viscous fluid in a rotating channel 35
Elliptic channels
Flow through a channel bounded by two confocal porous elliptic walls 393
Erratum 458
Error bound
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21
Existence and uniqueness
Existence and uniqueness of solutions of boundary value problems of third order nonlinear differential equations 105
Exponential pressure-gradients
Dusty viscous flow through a cylinder of triangular cross-section 169

Finite resistivity
Rayleigh-Taylor instability of compressible finitely conducting rotating fluid in the presence of a magnetic field 55
Finsler space
Finsler spaces with recurrent pseudocurvature tensor 363
Flat family
Compactification of generalised Jacobians 421
Fluid dynamics
Natural convection at a heated semiinfinite vertical plate with temperature dependent heat sources or sinks 369
Flux and drag
Dusty viscous flow through a cylinder of triangular cross-section 169
Forced convection
Temperature distribution in a laminar circular jet 49
Formal smoothness
Compactification of generalised Jacobians 421
Fourier-Mellin representation for operators
Descriptions of operators in quantum mechanics 69
Functions of operators
Descriptions of operators in quantum mechanics 69
Fundamental weights
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 193

Gas-particulate flow
Laminar boundary layer of gas particulate flow on a flat plate 377

Half-spaces
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 193
Heat flux bivector
Steady flow of a second-order thermo-viscous fluid over an infinite plate 157
Heat sources
Natural convection at a heated semiinfinite vertical plate with temperature dependent heat sources or sinks 369
Heat transfer
Temperature distribution in a laminar plane wall jet due to variably heated wall 181
Natural convection at a heated semiinfinite vertical plate with temperature dependent heat sources or sinks 369
Heisenberg group
Descriptions of operators in quantum mechanics 69
Heterogeneity
Stresses in spherical shells of heterogeneous dielectrics 387

Imbibition
Existence and uniqueness of similarity solutions of imbibition equation 409
Incompressible fluid
Dusty viscous flow through a cylinder of triangular cross-section 169
Infinitisimal deformations
Compactification of generalised Jacobians 421
Injection
Flow through a channel bounded by two confocal porous elliptic walls 393
Invariant theory
Compactification of generalised Jacobians 421

Jacobians
Compactification of generalised Jacobians 421
Jet flow
Temperature distribution in a laminar circular jet 49
Temperature distribution in a laminar plane wall jet due to variably heated wall 181

Laminar boundary layer
Temperature distribution in a laminar circular jet 49
Laminar boundary layer of gas particulate flow on a flat plate 377
Laminar flow
Natural convection at a heated semiinfinite vertical plate with temperature dependent heat sources or sinks 369
Limitation theorems
Limitation theorems for absolute Nörlund summability 115
Line bundles
Geometry of G/P—III (Standard monomial theory for a quasi-minuscule P) 193

Geometry of G/P—IV
(Standard monomial theory for classical types) 279
Compactification of generalised Jacobians 421
Love waves
On propagation and attenuation of Love waves 133

Magnetic Prandtl number
On Stoke's problem in magnetohydrodynamics 147
Magnetic pressure number
On Stoke's problem in magnetohydrodynamics 147
Magnetohydrodynamic flow
A numerical study of magnetohydrodynamic flow between a rotating and a stationary porous coaxial discs 399
Magnetohydrodynamics
On Stoke's problem in magnetohydrodynamics 147
Minuscule fundamental weights
Geometry of G/P—II
(Standard monomial theory fo. a quasi-minuscule P) 193
Minuscule parabolic subgroup
Geometry of G/P—IV
(Standard monomial theory for classical types) 279
Monotone matrix
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21
Moving divisors
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193

Natural convection
Natural convection at a heated semiinfinite vertical plate with temperature dependent heat sources or sinks 369
Navier-Stökes equations
A numerical study of magnetohydrodynamic flow between a rotating and a stationary coaxial discs 399
Newton-Raphson method
A numerical study of magnetohydrodynamic flow between a rotating and a stationary porous coaxial discs 399
Nörlund summability
Limitation theorems for absolute Nörlund summability 115

Ordinary differential equations
Existence and uniqueness of solutions of boundary value problems for third order nonlinear differential equations 105
Ordinary pairs
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193

Parabolic subgroups
Geometry of G/P—IV
(Standard monomial theory for classical type) 279
Period equation
On propagation and attenuation of Love waves 133
Pierie's formula
Geometry of G/P—IV
(Standard monomial theory for classical types) 279
Porous lining
Effect of porous lining on the flow between two concentric rotating cylinders 163
Porous media
Existence and uniqueness of similarity solutions of imbibition equation 409
Positive operators
On a theorem of Wigner on products of positive matrices 31
Projective bundle
Compactification of generalised Jacobians 421
Pseudocurvature tensor
Finsler spaces with recurrent pseudocurvature tensor 363
Pseudorecurrent space
Finsler spaces with recurrent pseudocurvature tensor 363
Pulsatile flow
On pulsatile flow of a viscous fluid in a rotating channel 35

Quasi-minuscule fundamental weights
Geometry of G/P—III
(Standard monomial for a quasi-minuscule P) 193
Quasi-minuscule parabolic subgroup
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Rayleigh-Taylor instability
Rayleigh-Taylor instability of compressible finitely conducting rotating fluid in the presence of a magnetic field 55
Reynolds number
A numerical study of magnetohydrodynamic flow between a rotating and a stationary porous coaxial discs 399
Rotating cylinders
Effect of porous lining on the flow between two concentric rotating cylinders 163

Sectional velocity
On pulsatile flow of a viscous fluid in a rotating channel 35
Semantics
On the covering of syntax-directed translations for context-free grammars 1
Semi-continuity
Compactification of generalised Jacobians 421
Shearing stress
Effect of porous lining on the flow between two concentric rotating cylinders 163
Shooting technique
Existence and uniqueness of similarity solutions of imbibition equation 409
Similarity
Existence and uniqueness of similarity solutions of imbibition equation 409
Sine transform
Flow through a channel bounded by two confocal porous elliptic walls 393
Singular curve
Compactification of generalised Jacobians 421
Skin friction
Flow through a channel bounded by two confocal porous elliptic walls 393
Special quadratic relations
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Spherical shell
Stresses in spherical shells of heterogeneous dielectrics 387
Spin-coefficient
A class of algebraically special null Einstein-Maxwell fields in Newman-Penrose formalism 125

Stable points
Compactification of generalised Jacobians 421
Standard monomials
Geometry of G/P—III
(Standard monomials theory for a quasi-minuscule P) 193
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Starlike
On α-close-to-convex functions 93
Steady flow
Flow through a channel bounded by two confocal porous elliptic walls 393
Stokes-Ekmann layer
On pulsatile flow of a viscous fluid in a rotating channel 35
Stresses
Stresses in spherical shells of heterogeneous dielectrics 387
Suction
Flow through a channel bounded by two confocal porous elliptic walls 393
Syntax-directed translation schema
On the covering of syntax-directed translations for context-free grammars 1
Thermo-mechanical interaction
Steady flow of a second-order thermo-viscous fluid over an infinite plate 157
Thermo-viscous fluids
Steady flow of a second-order thermo-viscous fluid over an infinite plate 157
Torsion free sheaves
Compactification of generalised Jacobians 421
Truncation error
Convergence of a numerical procedure for the solution of a fourth order boundary value problem 21
Twist-free and shear-free solution
A class of algebraically special null Einstein-Maxwell fields in Newman-Penrose formalism 125

Vanishing theorems
Geometry of G/P—III
(Standard monomial theory for a quasi-minuscule P) 193
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Velocity fields
Dusty viscous flow through a cylinder of triangular cross-section 169
Viscous compressible liquid
On propagation and attenuation of Love waves 133
Viscous incompressible flow
Temperature distribution in a laminar plane wall jet due to variably heated wall 181
Viscous incompressible fluid
Flow through a channel bounded by two confocal porous elliptic walls 393
Wave equation
On propagation and attenuation of Love waves 133
Wave-number
Rayleigh-Taylor instability of compressible finitely conducting rotating fluid in the presence of a magnetic field 55
Weakly standard monomials
Geometry of G/P—IV
(Standard monomial theory for classical types) 279

Weyl representation
Descriptions of operators in quantum mechanics 69

Wigner's theorem
On a theorem of Wigner on products of positive matrices 31

CONTENTS (Chemical Sciences)

INORGANIC AND ANALYTICAL

Magnetic and electrical properties of coordination polymers of 4,4'-dihydroxy-3, 3'-Diacetyl-biphenylbenzidine
J T D'Sa, K C Patel and R D Patel 63–67

2, 4-Lutidine-1-oxide complexes of lanthanide perchlorates
N S Navaneetham and S Soundararajan 131–135

Polarographic studies on the quantitative treatments of substituent effects of some aromatic isothiocyanates
Wahid U Malik, R N Goyal and Sudha Tyagi 137–141

Preparation and characterization of hydrazine derivatives. Part-II : Reaction of transition metal ammonium double sulphates with hydrazine hydrate
K C Patil, R Soundararajan and V R Pai Verneker 211–216

$Co_{3-x}Zn_xO_4$ ($0 \leqslant x \leqslant 1$) spinel oxides
J Gopalakrishnan, N K Appandairajan and B Viswanathan 217–222

Complexes of lanthanide nitrates with O, O', N-triisopropyl phosphoramidate
C Premlatha and S Soundararajan 291–296

Aromatic carboxylic acids as extraction system for vanadium in the presence of N-hydroxy-N, N'-diarylbenzamidine
K S Patel, R S Kharsan and R K Mishra 297–301

Spectrophotometric study of the formation of adducts between $U(TTA)_4$ and some neutral donors
S K Patil, V V Ramakrishna and A Ramanujam 303–312

Spectrophotometric determination of self-adducts of 4-methyl and 5-chloro-8-quinolinols with nickel(II)
Kashinath S Bhatki and Arvind T Rane 313–316

Characterisation of streaming polarographic maxima
P N Gupta 317–322

Complexes by polarography—zinc, copper, lead and indium complexes with mandelic acid
R Sundaresan 377–384

Synergism in the extraction of scandium
M Sudersanan 385–391

4-Nitro and 4-chloro pyridine-N-oxide complexes of lanthanide perchlorates
N S Navaneetham and S Soundararajan 413–420

The electrochemical behaviour of tris(N,N-disubstituted dithiocarbamato) complexes of ruthenium(III) in dimethylsulphoxide
Mushtaq Ahmed and Robert J Magee 401–411

A study of the nature of coordination in metal monothiocarbamates based on infrared spectroscopy and the HSAB concept
A B Crosby, R J Magee, M J O'Connor, K N Tantry and C N R Rao 393–399

ORGANIC

Reaction of acetylenic esters with 1,8-diaminonaphthalene, 1,8-dihydroxynaphthalene and 8-hydroxy-1,2,3,4-tetrahydroquinoline
M D Nair, K Nagarajan, J A Desai, Y S Kulkarni and R K Shah 1–9

Synthesis of 3-methyl-coumarins, -thiocoumarins and -carbostyrils
T Manimaran, M Natarajan and V T Ramakrishnan 125–130

Extraction of *Balsamodendron pubescens*: Stocks, Hook. Isolation and a new synthesis of siderin
Balawant S Joshi and Vinod R Hegde 185–190

New routes to condensed polynuclear compounds: Part XVIII—Cyclisations through naphthynes and pyridynes
S V Kessar, Y P Gupta, Paramjit Singh, S K Gupta and P S Pahwa 191–196

Synthetic studies in aromatic hemiterpenes of natural origin. Part 5: Synthesis of 6-acetyl-2,2-dimethyl-8-methoxychromene via benzylic oxidation route
M Venkama Naidu and G S Krishna Rao 197–201

Oxidation of organic compounds by phenyl iodoso acetate(II): Kinetics and mechanism of oxidation of aldo-sugars
Subas C Pati and Ramesh Chandra Mahapatro 203–210

Photo-oxygenations of bisphenylhydrazones, monophenylhydrazones, bishydrazones and monohydrazones of 1,2-diketones and related systems
V Bhat, V M Dixit and M V George 223–237

Spectroscopic properties of molecules related to hindered isomers of retinal
V Ramamurthy and R S H Liu 239–247

Oroxindin—A new flavone glucuronide from *Oroxylum indicum* Vent
A G Ramachandran Nair and B S Joshi 323–327

Nucleophilic substitution at a benzylic carbon by an ambident nucleophile—A linear free energy relationship
K Madhavan, V S Srinivasan and N Venkatasubramanian 329–335

Aspects of tautomerism 8-solvolysis of some pseudo and normal acid chlorides
M Vivekananda Bhatt, Shaker H El Ashry and M Balakrishnan 421–437

PHYSICAL AND THEORETICAL

Electrical conductivity studies in K_2SO_4–$ZnSO_4$ glasses
P S L Narasimham, Sudha Mahadevan and K J Rao 11–17

Phase transition in magnesium metavanadate
O G Palanna 19–23

Semiconductive properties of biologically important compounds. Gas adsorption effect on Vitamin A (alcohol and acetate)
Biswanath Mallik, Alpana Ghosh and T N Misra 25–32

Electrochemical reduction of Cu(II)-EDTA complex at dropping mercury electrode. An impedance approach
G A Bhat 33–41

Physico-chemical behaviour of binary liquid mixtures: *n*-butyl alcohol in cyclohexane
S Subba Rao and R Gopalakrishnan 43–45

Volume change on mixing: binary mixtures of methanol with isomeric butylamines
S D Pradhan 47–52

Conductance of sodium nitrate in ethanol-water mixtures at 35° C
Jomma S Chazhoor and T P Radhakrishnan 53–62

Solar energy and solid state chemistry
John B Goodenough 69–89

Electronic structure and conformational study of thiobiurets
V C Jyothi Bhasu, D N Sathyanarayana and C C Patel 91–100

Force field study of chloryl fluoride (ClO_2F) using Green's function procedure
R Namasivayam and S Nagarajan 101–107

Viscosities of binary mixtures containing one polar component
K Subramanyam Reddy and P R Naidu 109–112

Dehydration steps in $CuSO_4.5H_2O$ crystals
P N Nandi, D A Deshpande and V G Kher 113–124

Polarized crystal spectrum of bisethylenediamine copper(II) thiosulphate
Gobinda Basu 143–147

Thermodynamics of the complexation reactions of UO_2^{2+}, Be^{2+}, and Cu^{2+} with methoxybenzoic acids
B D Mali and L D Pethe 149–153

Spectral properties of some amino substituted *p*-benzoquinones
M S Ramachandran, U Chandra Singh, N R Subbaratnam and V K Kelkar 155–162

Kinetics of ruthenium(III)-catalysed oxidation of aromatic aldehydes by alkaline ferricyanide
P S Radhakrishnamurti and B R K Swamy 163–170

A quantitative aspect of charge-transfer phenomenon in the biological activity of hallucinogens, local anesthetics and nicotinic agents
S P Gupta and P Singh 171–177

Variational function of the Padè type—an application to a test system
K V Sane, R P Saxena and P K Srivastava 179–183

Volume change on mixing of isomeric butanols with normal heptane
Anil Kumar, S D Pradhan and S S Katti 249–255

Dissociation energy of P_2^+ molecule
T V Ramakrishna Rao and R Ramakrishna Reddy 257–262

Kinetic studies on the interaction of gold(III) with nucleic acids. I. Native DNA–Au(III) system—Spectrophotometric studies
Chhabinath Mandal and U S Nandi 263–278

Electronic and vibrational spectra of 3,6-dichloro-pyridazine
Nitish K Sanyal, S L Srivastava, R K Goel and S D Sharma 279–284

Melting of ice cubes under controlled conditions
R Pratap Singh and Vijay Kumar Upadhyay 285–289

Thermodynamic study of binary mixtures of isomeric butylamines with methanol enthalpy of hydrogen bonded complex
S D Pradhan and H B Mathur 337–350

A force field study of diacetylene molecule by kinetic constant method
S Mohan 351–358

Electronic absorption spectra of selenocarbonyl and thiocarbonyl compounds
M L Shankaranarayana and K N Tantry 359–366

Floating spherical Gaussian orbital model study of average electric polarisabilities and magnetic susceptibilities: Some aliphatic hydrocarbons
Shobha Bhargava and N K Ray 367–370

Synthesis and thermal stability of xylene-formaldehyde resins
Rajni Patel, K C Patel, B N Mankad and R D Patel 371–375

Effect of surface oxygen complexes of sugar charcoal on the half cell potential of carbon-nickel ferrite electrodes
N K Sandle and G Vasudev 439–444

A study of interaction in the lowest singlet and triplet states of H_2
K L Sebastian and A K Chandra 445–452

Green's function application to chemical perturbation studies
S Lacha Goud, V Balasubramanian and B K Gupta 453–455

Infrared spectra and normal vibrations of O-methylmonothiocarbonate, S-methyldithiocarbonates and N-methylmonothiocarbamates, methyltrithiocarbonate, and related ions
K N Tantry and M L Shankaranarayana 457–463

Liquids and liquid mixtures: Deduction of the BGY equation considering the angular distribution function
A Guha and T K Chatterjee 465–469

Proceedings of the Indian Academy of Sciences—Section A

Vol. 88, January-December 1979

CONTENTS (Earth and Planetary Sciences)

A qualitative appraisal of geomagnetic manifestations of the geological structures in the Indian equatorial region
A V S Murty and D R K Rao 1

Rb-Sr age of Godhra and related granites, Gujarat, India
K Gopalan, J R Trivedi, S S Merh, P P Patel and S G Patel 7

Vanadium, manganese and iron in the carbonate rocks of the Rohtas formation
Rajendra P Sharma 19

Annual fallout of ^{32}Si, ^{210}Pb, ^{22}Na, ^{35}S and ^{7}Be in rains in India
D Lal, V N Nijampurkar, G Rajagopalan and B L K Somayajulu 29

On the interpretation of velocities derived from spaced fading records
H Chandra 41

Solar zenith angle and frequency dependence of ionospheric *D*-region absorption
S L Jain and R K Rai 51

Remote probing of *D*-region irregularities
H Chandra and R A Vincent 57

Variation of F-region night-time neutral temperatures with equatorial spread-*F* activity
T N Rajaraman, J N Desai and S S Degaonkar 69

Effect of porosity on the cratering efficiency of underground peaceful nuclear explosions in a shale medium
Satish C Gupta, S K Sikka and R Chidambaram 77

Equatorial electrojet control on the low latitude ionospheric total electron content
G Sethia, K Chandra and R G Rastogi 87

Solar control of low latitude quiet-day magnetic field
B N Bhargava and G K Rangarajan 93

Characteristics of very high frequency and ultra high frequency waves after their passage through the equatorial ionosphere
M R Deshpande, Hari Om Vats and R G Rastogi 101

Wind-driven ocean circulation. A finite element analysis
R Natarajan, O P Sharma and H C Upadhyaya 111

Sediment movement and siltation in the navigational channel of the old Mangalore Port
M P M Reddy, V Hariharan and N P Kurian 121

Geochemistry and geochronology of sediments from the Bay of Bengal and the equatorial Indian Ocean
M M Sarin, D V Borole and S Krishnaswami 131

Search for superheavy elements in monazite from beach sands of South India using *K* x-ray fluorescence analysis
N N Ajitanand, Rekha Govil, S S Kapoor and D M Nadkarni 155

Preliminary investigations on dissolved uranium and silicon and major elements in the Mahanadi estuary
D V Borole, M Mohanti, S B Ray and B L K Somayajulu 161

On the reality of the effects of geomagnetic disturbances on vorticity area index at 500 mb
B N Bhargava and B R Arora 171

Some features of the south-west monsoon rainfall along the West Coast of India
R Ananthakrishnan, S S Aralikatti and J M Pathan 177

Magnetic storm effects in mesospheric winds and F_2 region electron density at mid-latitudes
H Chandra 201

Reflection and transmission coefficient of electromagnetic waves incident on a linear ramp model of earth surface layer
Ramesh P Singh and Rishi N Singh 209

On the origin of ionospheric sublayers in the lower thermosphere
J S Shirke and R Sridharan 219

Interaction of gravity waves with the ionospheric plasma and the production of electric fields and currents
S Prakash and R Pandey 229

A study of meteorite falls
Frans E Wickman and Carl D Palmer 247

Radiometric studies of box cores from the Ontong-Java plateau
R V Krishnamurthy, D Lal, B L K Somayajulu and W H Berger 273

Proceedings of the Indian Academy of Sciences—Section A

Vol. 88, January-December 1979
